What Is
XgenPlus Chat

XgenPlus is an Encrypted Instant Messaging App for organization available on play store and app store. XgenPlus chat allows a user to exchange messages (including images, videos, voice messages, files, live location) within the private groups, public groups or an individual chat. It also allows the user to send instant video recording and image capture within the chat. The app is designed in such a way that it provides the ease of chatting with utmost reliability and security.

Why A Business Needs
Xgenplus Instant Messaging Chat

In today's collaborative world of making interaction fast, secure and reliable, instant messaging platform has found a new space in the business. Though a secure email can be a choice to convey the message for instance but for deep, longer and continuous interaction a business needs an end to end encrypted instant real-time messenger that allows a user to send/receive a message in no time and enables interaction within the business or with customers flawlessly. XgenPlus Chat provides end to end 256-bit encryption that protects your business conversation with all kinds of attacks and hacks.

Most of the free instant messaging platforms provide end to end encrypted chat facility but encryption keys are stored on their own servers. So, anyone having access to the server can easily peep into your account and would be able to access information. Whereas, XgenPlus chat messenger gives flexibility to the business to have control of their database on their servers that eliminates the risk of data privacy hack.
